SUMMARY

MEAN Stack developer with 2 years of hands-on experience building and deploying full-stack web applications. Proficient in Angular, Node.js, Express, and MongoDB, with production experience in real-time systems (Socket.IO), payment integrations (Stripe, Razorpay), and cloud deployment on AWS EC2. Familiar with Clean Architecture and RESTful API design. Seeking a developer role where I can contribute immediately while continuing to grow.

TECHNICAL SKILLS

Frontend	: Angular, TypeScript, NgRx, HTML5, CSS3, EJS, ESLint
Backend	: Node.js, Express.js, JavaScript (ES6+), REST API, JWT Auth, Clean Architecture, MVC
Database	: MongoDB, Mongoose
Cloud & DevOps	: AWS EC2, NGINX, Git & GitHub, Vercel, Render
Integrations	: Stripe, Razorpay, Socket.IO, Multer, NodeMailer, Postman
CS Fundamentals	: Data Structures & Algorithms, OOP

PROJECTS

■ Projexpert (SaaS Project Management Platform) [Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#) *Stack : Angular , Node.js , Express , MongoDB , Socket.IO , Stripe , AWS EC2 , TypeScript*

One of my Full-Stack projects built with Angular and Express.js, designed as a scalable project management platform to streamline team collaboration and task execution, following Agile and Scrum principles

- Implemented **JWT-based authentication and role-based access control**
- Built **real-time chat and video call features** using **Socket.IO**
- Designed **subscription-based access** using **Stripe**
- Architected the backend using **Clean Architecture** principles
- Developed a **workspace-centric project management system**(workspace → project → epic → sprint → task) with team collaboration
- Enabled **project, epic, sprint, and task management** with access-controlled workflows
- Implemented **admin and company management** for user onboarding, access control, and workspace monitoring
- Deployed backend on **AWS EC2** with **NGINX**; frontend deployed on **Vercel** with automatic deployment on **Git push**

■ ShoeShope (E-Commerce Platform) [Live Demo](#) | [GitHub Repo](#) *Stack : HTML, CSS, Node.js, Express, MongoDB, RazorPay, EJS, AWS EC2*

Full-featured footwear e-commerce platform with admin tools, payment processing, and order lifecycle management.

- Implemented **session-based authentication using cookies** for secure user sessions
- Integrated **Razorpay** for secure online payments and order processing
- Built core e-commerce features including **wishlist, coupons, order tracking, and returns**

- Designed a **wallet system** to manage refunds and internal user balances
- Implemented **client-side image cropping** for product images using **Cropper.js**
- Developed admin tools for inventory management, product listings, order status updates, and sales analytics
- Deployed on **AWS EC2** using **server-side rendering** with **EJS**

■ Poll (Real-Time Voting Application)

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

Stack : Angular, TypeScript, Node.js, Express, MongoDB, Socket.IO

Mobile-first polling app with live vote updates, result visualization, and threaded discussions.

- A **real-time polling system** with instant vote updates and results visualization
- Implemented **live discussion** features to enable real-time user interaction during polls
- Designed a **mobile-first, responsive UI** to ensure smooth usage across devices
- Focused on **user-friendly interaction flows** for creating, participating in, and viewing polls
- Deployed frontend on **Vercel**, backend on **Render**

■ AjBlogs (Blog Application)

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

Stack : Angular, TypeScript, Node.js, Express, MongoDB

A personal blog platform built to learn Angular fundamentals - CRUD, routing, and component architecture.

- Implemented CRUD operations for managing blog posts
- Added search functionality to filter and find blog content
- Built a simple, minimal UI focused on core functionality
- Gained hands-on experience with **Angular component lifecycle, services, and reactive forms**

EDUCATION & TRAINING

■ Full-Stack MEAN Stack Development

2023 - 2026

Brototype, Kochi - Professional Training Program

[Certificate](#)

- Intensive industry-focused program covering Angular, Node.js, MongoDB, Express, AWS, and system design
- Built and deployed multiple production-grade projects as part of curriculum

■ Higher Secondary Education (Computer Science)

2012 - 2014

Kerala State Board
